### 微生物篩選

生物科技對飼料添加劑發展有重大影響，如益生菌。經由特殊選殖、基因工程，一些菌株被應用來提升動物消化、免疫和繁殖表現。貿立公司益生菌產品貿速寶含有多株枯草芽孢桿菌和液化澱粉芽孢桿菌，系以特殊培養基選殖高酵素活性、黴菌毒素降解和病原菌抑制率。經由研究機構、商業豬場測試，貿速寶能顯著刺激增重、飼料效率與生產力，且降低臭氣逸散。

### Microbial isolation

Biotechnology has greatly impacted on the development of feed additives such as probiotics. By specific isolation and gene engineering, some microbes are used to increase digestion, immune activity, and productive performance in animals. Our probiotics product MoreSpore contains several strains of *Bacillus subtilis* and *Bacillus amyloliquefaciens* which are specifically cultured under selected medium for enzymatic activity, mycotoxin degradation, and pathogen inhibition. MoreSpore has been demonstrated by research institutes and commercial farms to significantly stimulate growth rate, feed efficiency and productivity with less odor emission.
